LOCATIONS

As part of an Interagency Agreement between Department of Health Care Services and the California Department of Education, all MTU sites are on school district properties. We are currently at the following locations:

Medical Therapy Unit

1595 Quintara St

Sunset District

Golden Gate Satellite

1025 Laguna St

Western Addition

PHYSICAL THERAPY

Physical therapists help children develop gross motor skills such as:

- Sitting
- Standing
- Walking

Physical therapists evaluate for bracing and DME such as walkers and wheelchairs.

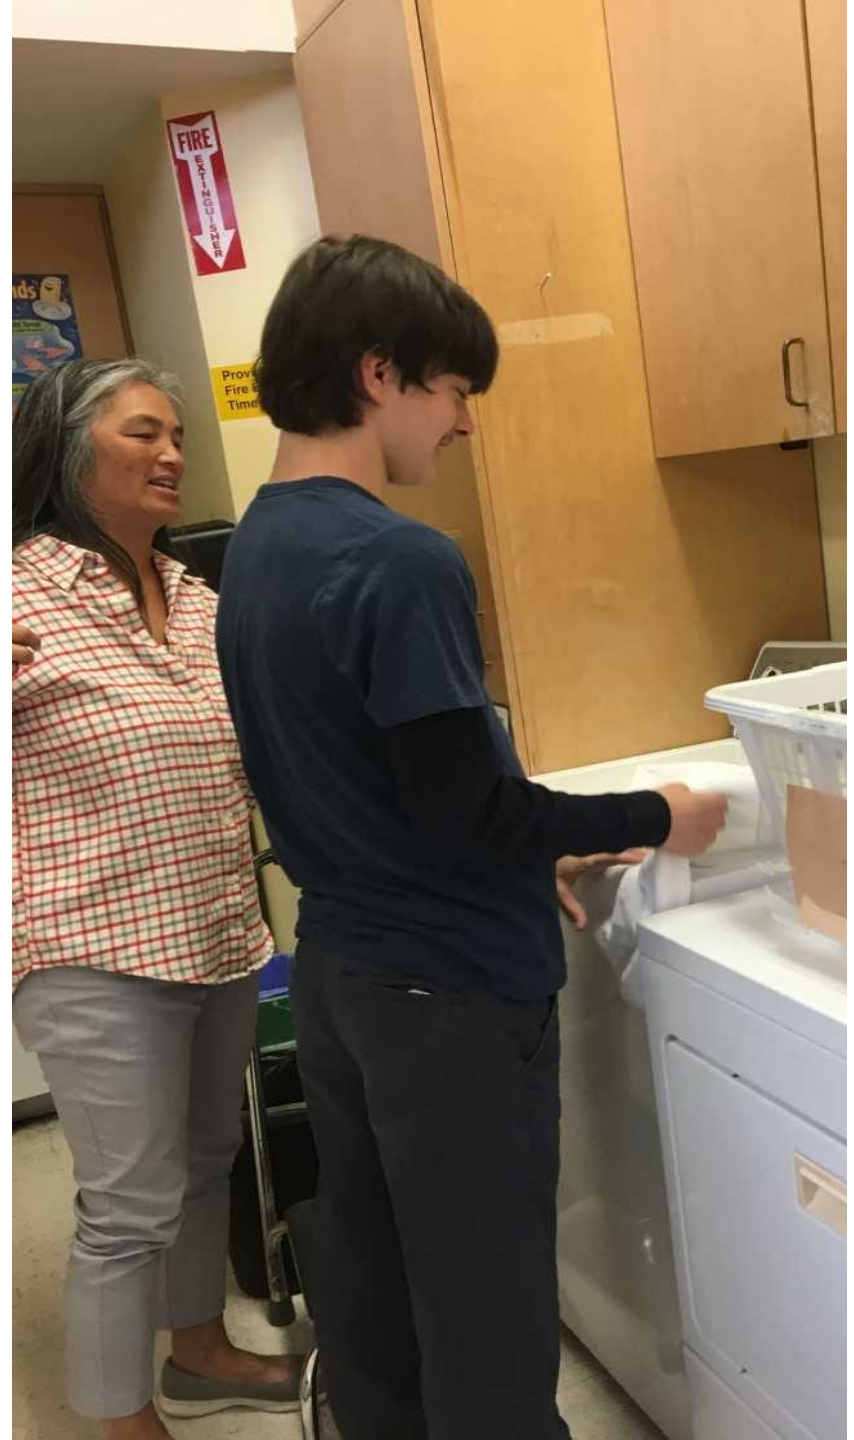

OCCUPATIONAL THERAPY

Occupational therapists work to help children improve skills such as:

- Functional fine motor skills
- Feeding/eating
- Dressing
- Self-care
- Play skills
- Improving independence at home and in the community.
- Communication (e.g. use of computer or communication device).

MEDICAL THERAPY CONFERENCE

Pediatric subspecialty physicians provide medical direction for MTU services and help with plans of care.

Participants: PT, OT, SW, parents, grandparents, teachers, PCP,...

Services based on an individual's medical needs, not formularies.

PARENT INVOLVEMENT

Therapy is a team effort.

Activities need to become a part of everyday life.

Parents are the team leaders. With education from the therapists, the parent can coordinate efforts at home and school to help their child achieve their goals.

We practice family centered care that values family strengths and needs.

RELATIONSHIPS

Family Centered Care
CCS therapists establish long term child/family relationships

Therapists work closely with pediatric subspecialists to plan care, interventions, and follow up.

Collaboration with community partners such as Golden Gate Regional Center, Support for Families, SFUSD, and other DPH departments.
