COURSE DIRECTOR
Trevor Jensen, MD, MS
Associate Clinical Professor of Medicine
Division of Hospital Medicine
University of California, San Francisco
San Francisco, California

Point of Care Ultrasound for the Hospitalist

Center for Nursing Excellence • San Francisco, CA

The UCSF Point-of-Care Ultrasound (POCUS) for the Hospitalist Workshop is a hands-on experience to learn the techniques of bedside ultrasound. Live demonstrations, case review, and didactics will complement hours of hands-on practice sessions. Participants will gain the skills, knowledge, and confidence to integrate bedside ultrasound into clinical practice.

We will have a traditional and advanced track – both of which can count towards the SHM POCUS COC. The traditional track will match prior year content and focus on the core skillsets needed as a practicing hospitalist (and those required for mastery for the SHM Certificate of Completion). The advanced track is targeted towards those with prior POCUS exposure (ideally a prior 2 day workshop or more) and those who seek to use more advanced skills or to be a POCUS educator.

LOCATION
Center for Nursing Excellence • University of California, San Francisco
2001 The Embarcadero, First Floor • San Francisco, CA 94133
