

MIM Harmony™

Rethink Peer Review

Your TPS is no longer the best choice for peer review.

A Platform with Purpose

MIM Harmony is a dedicated platform designed for rapid and reproducible treatment plan review. MIM Harmony standardizes the review process and frees up valuable time for clinicians to focus their efforts on a deeper, critical evaluation of patient cases, fully achieving the fundamental goal of peer review.

Review More, Prepare Less

MIM Harmony's intuitive worklist, flexible task automation, reporting tools, and analytics enhance multiple peer review formats, including chart rounds, contour rounds, and one-on-one consults.

MIM Harmony moves beyond traditional peer review to allow for the capture of data to perform analytics and guide practice improvement. It's time to rethink what you expect from peer review.

MIM Harmony At-a-Glance

- Automated case preparation using MIM Assistant®
- Custom worklists standardize meeting formats
- Templated questionnaires provide structured feedback
- Data-driven insights for standardized practice improvement
