# Sports Medicine

## for Primary Care Providers, Athletic Trainers, and Physical Therapists

### OBJECTIVES

Primary care physicians, athletic trainers and physical therapists will be able to:

- Conduct efficient and accurate sideline and office-based musculoskeletal examinations.
- Diagnose the most common musculoskeletal injuries in people of all ages using history, exam, and (if needed) imaging.
- Understand the most up-to-date and evidence-based treatments for common musculoskeletal problems, from the athletic training room to the physical therapy office, from the clinic to the operating room.
- Identify opportunities in which collaborating with different types of sports medicine professionals can benefit a patient's care.
- Learn from experts in their respective fields on topics such as sports concussion management, musculoskeletal ultrasound, health equity and sports medicine, running medicine, orthobiologics, joint injections, splinting and bracing, and joint replacement.
